

## Dominant Species of the Sample

- Calanus finmarchicus | 3.35%
- Calanus finmarchicus | 28.24%
- Calanus glacialis | -74.01%
- Calanus hyperboreus | -53.77%
- Oithona similis | -94.69%
- Microcalanus pygmaeus | -98.00%
- Metridia longa | -43.42%
- Metridia longa | 25.00%
- Acartia longiremis | -34.59%
- Metridia lucens | -20.88%
- Metridia lucens | 33.33%
- Oithona atlantica | -93.56%
- Microcalanus pusillus | -52.72%
- Microcalanus pusillus | 20.69%
- Pseudocalanus elongatus | -93.88%
- Thysanoessa spp. | -92.93%
- Temora longicornis | -84.88%
- Temora longicomis | 04.0
- Acartia spp. | -68.17%
